I pair my creativity with technical skills to build design-oriented, intuitive and accessible websites. My work is bolstered by my empathetic nature from previous experiences in customer-focused and collaborative roles, as well as a curious mindset that I bring to every team.

PROJECTS

WHERE TO EAT *React | JavaScript | Firebase | CSS3*

A responsive app that acts as a community database of users favourite restaurants in Toronto based on flavours and food.

BOTTLED *JavaScript | API | SCSS | Paired Programing*

A beautiful app that returns the closest bottle shops ~*previously know as restaurants*~ based on the user's inputted location.
